

EARTHING ELECTRODES

Copper bonded chemical earthing electrode

A steel core molecularly bonded with copper, giving copper's conductivity and corrosion resistance at a lower cost than solid copper. This is the electrode most commonly specified for chemical earthing in India, and the one we supply in the largest volumes.

Sizes: 48, 58 and 76 mm dia. 2 m and 3 m length.

Used in: industrial plants, commercial buildings, residential projects, substations.

Specifications

Material	Steel core with molecularly bonded copper
Diameters	48 mm, 58 mm, 76 mm
Lengths	2 m and 3 m
Copper coating	30–40, 100 and 250 micron
Type	Chemical earthing, maintenance free
Supplied with	Backfill compound as required
Bulk supply	Yes
Custom sizes	On request
